Application/Control Number: 10/526,378 Page 2

Art Unit: 1793

1. The Amendment filed October 13, 2009 has been entered. Claims 12-21 are pending, with claims 12-16 and 21 withdrawn from consideration as directed to a non-elected invention.

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Higo et al. (PG Pub.No. 2001/0001049), in view of Claessens et al. (PG Pub.No. 2001/0007280) and Fujita et al. (PG Pub.No. 2004/0202889), for reasons as stated in the prior Office Action, taken with the following.

Briefly, Higo discloses a process as presently claimed, performed upon a composition overlapping that as recited in instant claim 17. While Higo does not specify the heating and cooling rates presently claimed, Claessens and Fujita indicate that the rates as claimed are conventional in the art of producing galvanized steel sheets in processes analogous to that of Higo. These disclosures of Claessens et al. and Fujita et al. would have motivated one of ordinary skill in the art to employ the presently claimed heating and cooling rates when carrying out the process as disclosed by Higo et al.

Application/Control Number: 10/526,378

Art Unit: 1793

4. In the response filed October 13, 2009, Applicant has amended the independent claim to narrow the ranges of Mn and Cr in the steel used in the claimed process, and argues that the contents of Mn and/or Al in the claimed process are distinct from those of Higo. The examiner respectfully disagrees. Paragraphs [0023] and [0029] of Higo disclose prior art ranges that encompass the ranges as presently claimed, and no evidence of record would indicate the presently claimed narrower ranges to result in a process patentably distinguishable from that of Higo, which the examiner submits indicates the utility of the prior art process over the entire disclosed range. The Cr range in claim 17 as amended is lower than that recited in paragraph [0039] of Higo. However, i) Higo clearly indicates that Cr is an optional element and therefore amounts of Cr as low as 0% are within the purview of Higo, and ii) the tables of Higo include specific examples in which the amount of Cr is within the presently claimed range.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Wyszomierski whose telephone number is (571) 272-1252. The examiner can normally be reached on Monday thru Friday from 8:00 a.m. to 4:30 p.m. Eastern time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King, can be reached on (571) 272-1244. All patent application related correspondence transmitted by facsimile must be directed to the <u>central facsimile number</u>, (571)-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
